Modular Connection Flexibility

Connection Types

1. Gypsum Panel
2. Concealed connector, resulting in progressive construction
3. Modular connector
4. Aluminum Frame Panel
5. MP-Clip connector to create a non-progressive construction
6. Partial height furniture adapter, a structural connection

Modular Connectors works with the non-progressive Aluminum Frame Panel and the progressive Gypsum Panel.

Different connections, progressive and non-progressive, are available for different functional and security needs.

Many different angle connectors are also available for unique project requirements.
